Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 12-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Freye.

Freye discloses a first handheld element having a first surface thereon (11); a second handheld opposing surface thereon(12); a biasing mechanism disposed between said first handheld element and said second handheld element that applies a force that opposes the alignment of said first surface with said second opposing surface (col. 3, lines 61-65).

As for claim 3, Freye discloses said first handheld element is symmetrically disposed around a first linear axis and said second handheld element is symmetrically disposed around a second linear axis, wherein said first linear axis are aligned when said first surface is aligned with said second opposing surface (fig. 1).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3764

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Freye.

Freye does not disclose the weight of the hand held elements, however it would have been an obvious design choice to have the weight of the hand held elements between 2 and 25 pounds, for provided a weighted resistance to the exerciser.

Claims 4-11, 17, 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shahinian discloses a rotator exercise device.

Guibert discloses an articulated manual exercise bar.

Yu discloses a multi directional swivel body builder.

Travis discloses an aerobic wand.
